Dear Dave

### Performance

rp<sup>2</sup> provided on and offshore performance coaching for BG in the UK some 6 years ago. Since then, BG has not been without a performance coach embedded within the Well Engineering team. Once we were up and running with a couple of campaigns under our belts, the systems that we introduced with rp<sup>2</sup> were considered sufficiently robust for us to take them on ourselves. This provided us with another step change in performance which came about due to the teams driving it from within. The enabling environment that you are so passionate about and deliver in such a compelling manner is very much alive and well at BG.

Yours sincerely,

**Peter Greaves**  
BG HPHT Wells Team Leader
