Abu Dhabi 3 day open seat Trouble Free High Angle, ERD & Complex Wells training course
3 – 5 March 2015

These are difficult times for many in the Drilling industry. At Merlin ERD we believe that the glass is always “half full” and that we should look after others in our Drilling family. As such, we are making five places available on our courses at a nominal rate for those affected by the current downturn and have been out of work for three months or more. This will not only allow them to use this time constructively, but increases their skill-set and employment opportunities by gaining this sought after training.

If you are, or know of an experienced Drilling professional (Engineer or Supervisor etc), that is interested in this opportunity, please email details to Pam, our Training Co-ordinator, Training@MerlinERD.com

Places are limited and will be assigned on a discretionary basis by Merlin ERD Ltd.

Note from SPREAD moderator (Dave Taylor): Whilst we do not normally permit 'advertising' on SPREAD, we consider this to be an honest effort by Merlin-ERD to help others. They approached us and asked permission, which we duly granted.
